
ManoPot

Release 1.0.0

Apurv Goyal

May 14, 2022

CONTENTS:

1	ManoPot Quickstart	3
1.1	Installation	3
1.2	Running	3
1.3	Debian package	3
1.4	Source Code	3
1.5	PyPI package	4
1.6	Documentation	4
2	Indices and tables	5

MANOPOT QUICKSTART

ManoPot is a simple TCP HoneyPot written in Python 3.

1.1 Installation

```
python -m pip install manopot
```

1.2 Running

```
python -m manopot
```

1.3 Debian package

ManoPot can also be installed as a systemd service on Debian based distributions.

Download the package from GitHub release, or build the Debian package with:

```
dpkg-deb --build ./deb manopot-1.0.0.deb
```

Install the Debian package with:

```
sudo dpkg -i manopot-1.0.0.deb
```

Config defaults to /etc/manopot.ini. Logs will be available in /var/log/manopot.log.

1.4 Source Code

<https://github.com/Rand0mAccess/ManoPot>

1.5 PyPI package

<https://pypi.org/project/manopot/>

1.6 Documentation

<http://manopot.rtf.d.io/>

INDICES AND TABLES

- `genindex`
- `modindex`
- `search`
